-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 10 is objected to because of the following informalities: line 2 of claim 10 "re" should be replaced with ---are---. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 7-9,11,12 are rejected under 35 U.S.C. 102(b) as being anticipated by Love US PN 4,470,157.

Love discloses in figures 1-4 and lines 21 of col. 3 through line 25 of col. 4 a method of making a heart valve comprising cutting three leaflets from flexible material, sewing the edges to form a tubular structure, placing the inner faces of each leaflet in facing relationship at the outflow end, and suturing (20) the leaflets to hold in place.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Love US PN 4,470,157 as applied to claims 7 and 9 above, and further in view of Hancock US PN 3,755,823.

Love meets the structural limitations of claim 10 as described above but lacks the express written disclosure of providing reinforcements for the sutures. Hancock teaches in lines 4-17 of col. 2 and lines 40-53 of col. 4 a method of making a heart valve including providing suture reinforcements in order to distribute the load on the sutures preventing possible cutting of valve material.

Therefore it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the method disclosed by Love by including suture reinforcements as taught by Hancock in order to distribute the load on the sutures preventing possible cutting of valve material.
